Company Details

company - Sun Trust Bank NY

description - Sun Trust Bank, NY JAN 2018 to present

Client: Sun Trust Bank NY

Environment: Informatica Power Center 9.1, Oracle 11g, unix.

Role: ETL Developer

Project Profile:

Sun Trust Bank is a US based multinational financial services holding company, headquarters in NY that operates

Financial services and support to the other divisions.

The objective of the first module was to create a DR system for the bank with a central point of communication

FX asset classes.

Contribution / Highlights:

- Liaising closely with Project Manager, Business Analysts, Product Architects, and Requirements Modelers

- Development using Infa 9.1, 11g/Oracle, UNIX.

- Use Informatica PowerCenter for extraction, transformation and loading (ETL) of data in the Database.

- Created and configured Sessions in Informatica workflow Manager for loading data into Data base tables

- Unit testing and system integration testing of the developed mappings.

- Providing production Support of the deployed code.

- Providing solutions to the business for the Production issues.

- Had one to One interaction with the client throughout the project and in daily meetings.

Project #2

company - Marshall Multimedia

description - JUN 2016 to DEC 2017

Client: Marshall Multimedia

Environment: Informatica Power Center 9.1, Oracle 11g, unix.

Role: ETL Developer

Project Profile:

Marshall Multimedia is a US based multimedia advertisement services based organization which has head quarter in New York. EGC interface systems are advert management, Customer Management, Billing and Provisioning Systems for Consumer & Enterprise Customers.

The main aim of the project was to create an enterprise data warehouse which would suffice the need of report rejection reports. The professional reports were created by Cognos and ETL work was performed by Informatica. This project is to load the advert details and magazine details coming in Relational tables into data rules.

Contribution / Highlights:

- Developed mappings using different sources by using Informatica transformations.

- Created and configured Sessions in Informatica workflow Manager for loading data into Data Mart tables.

2

- Unit testing and system integration testing of the developed mappings.

- Providing solutions to the business for the Production issues.

Project #3

company - Assurant healthcare/Insurance Miami USA

description - Assurant, USA

NOV 2015 to MAR 2016

Project: ACT BI - State Datamart

Client: Assurant healthcare/Insurance Miami USA

Environment: Informatica Power Center 9.1, Oracle 11g, unix.

Role: ETL Developer

Project Profile:

Assurant, Inc. is a holding company with businesses that provide a diverse set of specialty, niche-market insurance products in the property, casualty, life and health insurance sectors. The company's four operating segments are Employee Benefits, Assurant Health, Assurant Solutions and Assurant Specialty Property.

The project aims at building State Datamart for enterprise solution. I am part of the team which is responsible for Design & development along with testing.

Contribution / Highlights:

- Performed small enhancements

- Daily load monitoring

- Attend to Informatica job failures by analyzing the root cause, resolving the failure using standard documented process.

- Experience in writing SQL statements.

- Strong Problem Analysis & Resolution skills and ability to work in Multi Platform Environments

- Scheduled the Informatica jobs using Informatica scheduler

- Extensively used ETL methodology for developing and supporting data extraction, transformations and loading

- Involved in creating the Unit cases and uploaded in to Quality Center for Unit Testing and UTR

- Ensure that daily support tasks are done in accordance with the defined SLA.
