Company Details

company - Arsys inovics pvt ltd

description - Project - F-MAS (Frequency Monitoring and Analysis Systems - (F-MAS))

F-MAS is a project for managing network inventory, network communication, fault management & network troubleshooting

Responsibilities:

• Participated in entire lifecycle of the projects including Design, Development, and Deployment, Testing and Deployment.

• Developed views and templates with Python and Django's view controller and templating language to create and manage the application.

• Implemented navigation rules for the application and page outcomes, written controllers using annotations and Django REST API.

• Created this project using Django, Django REST API, MYSQL, PyMYSQL, Python, HTML5, CSS3.

• Created CRUD methods (get, post, put, delete) to make requests to the API server and tested Restful API using Postman.

• Created Unit test cases for unit testing.

• Worked with JSON based REST Web services

• Wrote Python routines to log into the websites and fetch data for selected options.

• Used Python modules such as requests, urllib for web crawling.

• Added the navigations and paginations and filtering columns and adding and removing the desired columns.

• Created a Git repository and added the project to GitHub.

• Utilized Agile process and JIRA issue management to track sprint cycles.

• Worked in an agile development environment.

Environment: Python, Django, MySQL, HTML, CSS, SQLAlchemy, JSON, agile, Web Services (REST), Urllib3
